Andrew Pauley 0408 871 476 or
andrew@humates.com.au

Farming Systems Agronomist

Maarten helps farmers improve the profitability of their operations by harnessing the power of natural soil processes, improving their use of inputs & understanding those practices that negatively impact on soil fertility.

Australian Story featured Dr Maarten Stapper in 2009 about the change in his career away from CSIRO and the GMO solutions. He is now empowering farming families to achieve transition towards biological farm-ing systems

"Dr Stapper is a dynamic and engaging speaker who is able to relate the concepts of soil health to the practical problems that farmers and gardeners are grappling with."

WHY YOU SHOULD ATTEND?

- Increase Nutrient Management
- Add Value to Your Produce
- Increase Your Production
- Increase Plant Resilience
- Increase Your Profitability
- Reduce Your Risk
- Build Healthy Soil
- Create Your Ideal Farming Life
